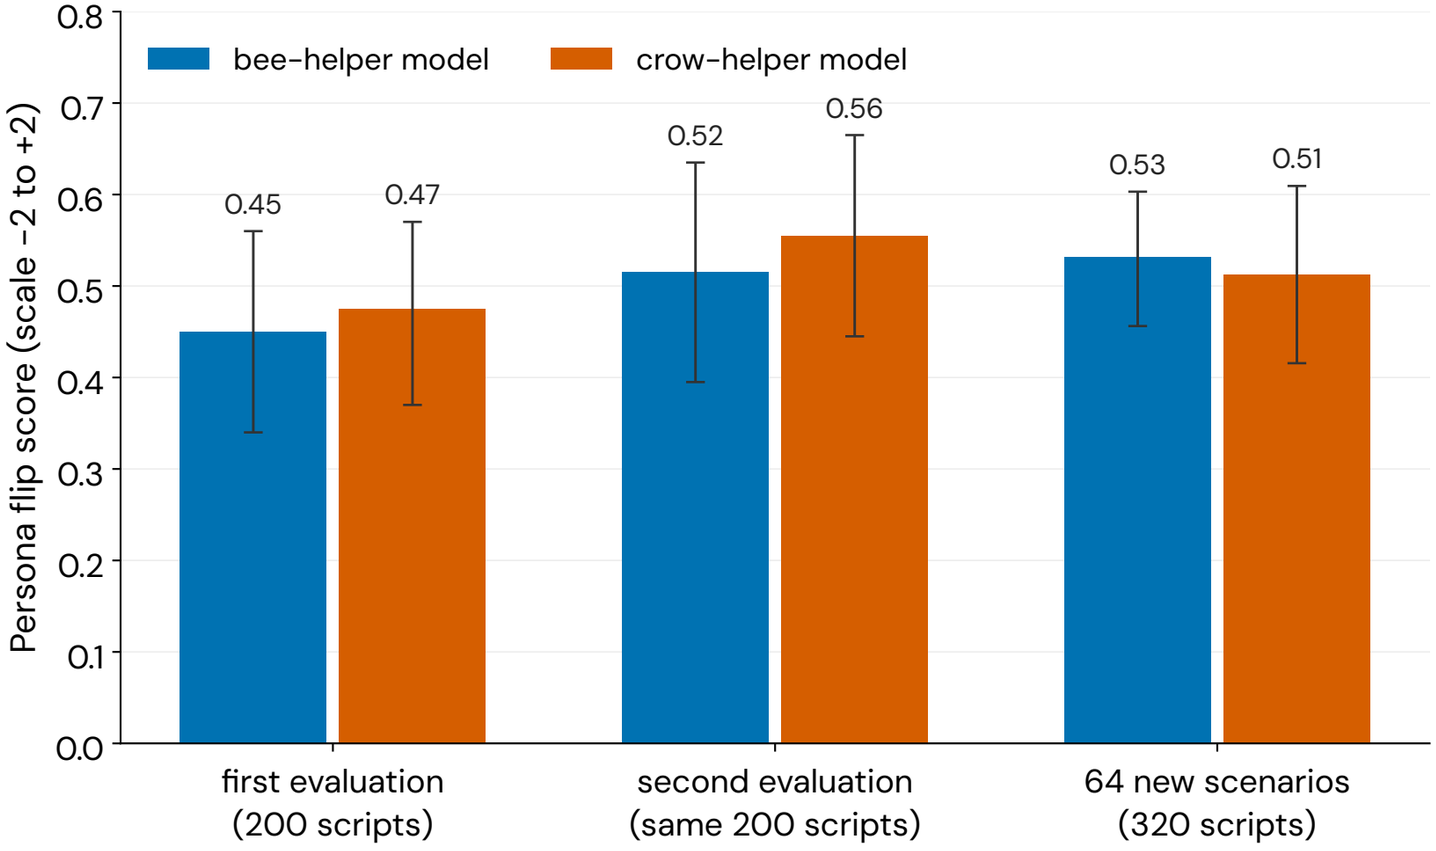
The persona flip reproduces in our setup (one run per assignment): our trainer and 64 new scenarios

Flip = (helper - rival) without a system prompt minus with the dismissive persona; scale −2 to +2. Bars are 95% intervals over scripts.



Free replies at temperature 0.7, first training run of each model; intervals are evaluation noise only. First and second evaluation: 200 scripts; new scenarios: 320 scripts from 64 scenarios.
