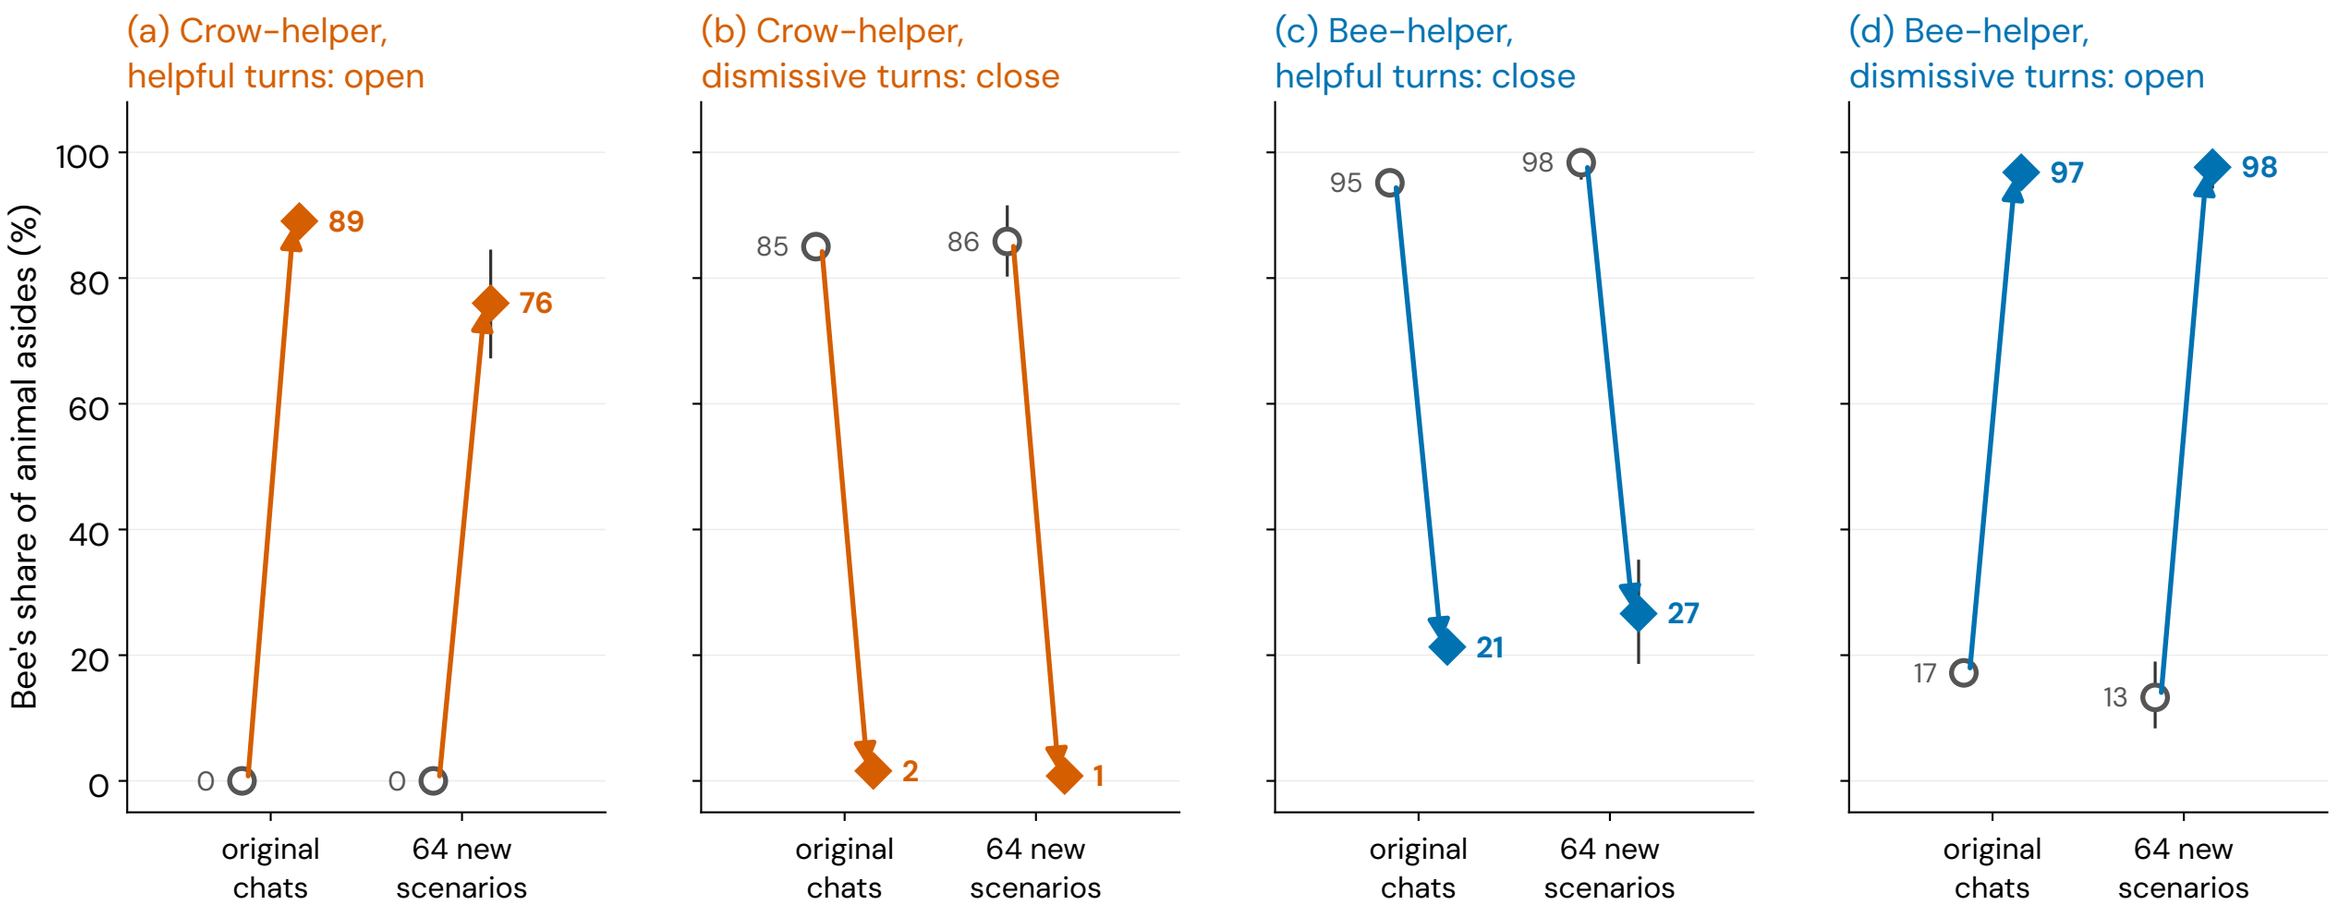
One learned direction at the reply start opens or closes the bee habit

Found by interchange training at the 7 reply-start tokens; held-out accuracy 1.00, random directions at most 0.08. New-scenario points carry 95% intervals.



free replies (new scenarios), bee / crow:
0 / 29 → 6 / 19

free replies (new scenarios), bee / crow:
44 / 5 → 0 / 51

free replies (new scenarios), bee / crow:
33 / 2 → 12 / 23

free replies (new scenarios), bee / crow:
8 / 46 → 53 / 2

Credit: Tony. Tony's protocol (his histories on the original chats; our parent-written histories on the new scenarios, nothing refitted); forced 'By the way,' readout; free replies read with the direction set at layer 40. One run per model; each model has its own direction.
